WORK EXPERIENCE

Student Aid
Pima Community College
05/2016 – 02/2017   *Tucson, Az*

PERSONAL PROJECTS

YouTube API (04/2017 – 04/2017)
- -Youtube Search API
- Application built with Angular Framework and Gulp.
- -This application allows the user to search popular videos or related queries from Youtube.

Nike Clone (04/2017 – 04/2017)
- Built in Angular, Postgres, Express, Auth0,
- Project also built in Ionic (Mobile)
- The site allows you to view and add various shoes to your cart. You can then view your cart and proceed to checkout. Shoes (once bought) will be saved into a database of previously bought products.
- A full stack application built primarily with Angular framework. It was then recreated as an Ionic application available for all mobile platforms.

Google Docs Clone (05/2017 – 05/2017)
- Group Project Built with 3 other students in 2 weeks
- Buit in Angular, PostgresSQL, Express, Auth0, Quill, Jquery, Node
- Replica of Google Docs, Slides, Excel, and Drive
- Lead Of Front-End Development

Google Docs Clone (05/2017 – 05/2017)
- Buit in Angular, Postgres, Express, AuthO
- In this application in DevMtn the group cloned GoolgeDocs. In this project there are there separate views that have all differenct functionality.
